SKILLS

VUE.JS

TYPESCRIPT

REACT

JAVASCRIPT

PYTHON

NODE.JS

POSTGRESQL

HTML/CSS

GIT

DOCKER

SOFT SKILLS

- Ownership & accountability
- Fast learner across new technologies
- Problem-solving in ambiguous situations
- Communication with non-technical stakeholders
- Self-motivated with a strong drive for deep work
- German – Native
- English – B2–C1

ABOUT

Frontend engineer with **4+ years of production experience** building complex, customer-facing web applications. I care about code that lasts – readable, maintainable, and built with the people using it in mind. Currently expanding into **full-stack development** through a professional bootcamp (April–August 2026). I work best when I have **ownership**, enjoy figuring out ambiguous problems, and genuinely enjoy digging into complex problems until they click.

EXPERIENCE

FRONTEND DEVELOPER

EXP (formerly exentra) (2022–2026)

Complex web application for an international agricultural machinery manufacturer. Vue.js, TypeScript, AG Grid.

- Developed and shipped multiple data-heavy features; owned entire lifecycle from analysis through deployment
- Conducted independent data analysis project: built Python visualizations analyzing prototype scrapping costs
- Worked closely with stakeholders during customer demos; rapid feedback loops refined problem-solving approach
- Contributed to code quality: code reviews, test coverage, refactoring; focus on maintainability and scalability

SELF-EMPLOYED | E-COMMERCE

Handcrafted Shops (2020–2022)

E-commerce projects for various clients. Shopware 5, design implementation, project coordination.

- Owned project lifecycle: shop setup, design implementation, technical integration, client handoff
- Designed and built storefronts on Shopware; managed scope and stakeholder communication
- Built practical knowledge in systems thinking: infrastructure fundamentals, vendor management, customer support

PRODUCTION & E-COMMERCE

BN-Pipes – Stainless Steel Sports Exhausts (2013–2025, part-time)

Various roles in different time models. Started in production, gradually took over all e-commerce and IT responsibilities from around 2017.

- Stepped in as the only available person to take on e-commerce operations; self-taught, expanded and managed the platform over time
- Handled online shop infrastructure, product management, and technical troubleshooting independently
- Built practical knowledge in system administration, vendor management, and customer communication

EDUCATION

Full Stack Developer Program

Professional Bootcamp (Apr 2026–Aug 2026)

Node.js, database design, Python, React

Frontend Developer Bootcamp

(Mar 2022 – Jun 2022)

React, JavaScript, HTML, CSS

Fachabitur

BOS Scheyern (2012–2014)

Technical stream, final grade: 2.8

Biological-Technical Assistant (BTA)

Chemieschule Dr. Erwin Elhardt, Munich (2006–2009)

Molecular biology, genetic engineering, microbiology, biochemistry, cell cultures

TECH

Frontend: Vue.js (strong), React (learning), TypeScript, JavaScript, HTML, CSS, AG Grid

Backend: Python (learning), Node.js (learning), PostgreSQL, Fastify (basics)

Tools: Git, Docker (basics), Modern tooling (Vite, Webpack), Testing

Approach: AI-assisted development (Claude Code, Cursor), Agile, Ownership-driven, Scrum, Jira, Confluence
